

Universal Display System User Instructions

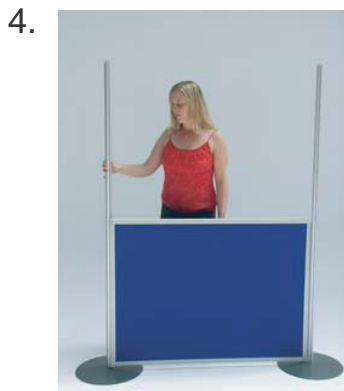

Take the pole and screw into the 40cm diameter base

Take one of the security mouldings and drop down one of the sections of the pole

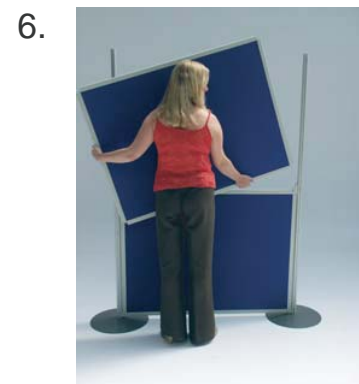

Secure the moulding into position with a screwdriver, repeat this process on the second pole

Position the board on top of both bottom mouldings

Twist the pole to give easy access to secure the moulding into position

Slide the next two sets of mouldings down the insert in the pole, and position the next board on top and secure into position

Insert the top mouldings and again twist the pole for easy access

To add a header panel, insert the header pole into the top of the main pole and secure using the mouldings as previously shown

Continue with this process with as many panels as you require for your exhibition / display
